EXPERIENCE

Backend Developer

UBA PLC

October 2023 - Present

At UBA PLC, I write python middleware that communicates with the VAS platform and communicates with third party APIs for seamless data transmission. I also develop frontend and backend systems for applications that are used internally within the bank.

IT Specialist

Lagos Business School, Lekki

October 2022 - Present

Working in the IT department of Lagos Business School, I monitored online sessions and work with video and audio equipment, as well as maintaining servers.

Web administrator

Shelter Solutions and Engineering Limited, Lekki

July 2022 - Present

Appointed as web administrator, to oversee online marketplace and effect changes to website architecture, information and communication

Frontend Developer Intern

Lunoid Technologies, Lekki

July 2021 - September 2021

Designed landing pages for clients. Implemented these designs using HTML, CSS and Javascript

EDUCATION AND CERTIFICATIONS

Bachelor of Science (BSc) in Software Engineering

American University of Nigeria, Yola

September 2018 - May 2022

Second Class Upper, 2:1, Software Engineering

Led my team to an A Grade in our final project, being lead developer for the development of an online marketplace directly connecting local farms to consumers

Google UX Design Certificate

Coursera Issued September 2022

UNICEF International Model United Nations

UNICEF Issued April 2021
